

# “X” STRAP OPTION

**The “X” STRAP**  
The “X” strap is our most popular option on the professional series bags. This is a removable extra shoulder strap that you quickly click onto the main shoulder Strap when you need two-shoulder support or when your load is really heavy. When you don’t need it, it stores neatly on the bag flap. Large adjustments are done where the strap connects to the bags base. Fine adjustments are done where the strap attaches to the shoulder strap. When you are not using the “X” strap you can fold down the 1” female buckle on the main shoulder strap to keep it out of your way as you swing the bag around.

“X” strap on second shoulder To help balance heavy loads

Snaps to flap when not in use. Can also be completely removed from bag.

Fold down 1” buckle on main shoulder strap
